SENIOR SOFTWARE ENGINEER

Senior Software Engineer with 6+ years of experience in full-stack, mobile, backend, and distributed systems development. Strong expertise in React, Next.js, Golang, React Native, TypeScript, Node.js, NestJS, PostgreSQL, MongoDB, Redis, Docker, Kubernetes, microservices, and cloud infrastructure. Proven ability to design scalable systems, optimize performance, automate workflows, and deliver high-impact features in fast-paced environments.

CORE SKILLS

- **Frontend:** React, Next.js, React Native, TypeScript, Tailwind, Redux, Zustand
 - **Backend:** Node.js, NestJS, Golang, Express.js, REST, GraphQL, WebSockets, Microservices
 - **Databases:** PostgreSQL, MongoDB, Redis
 - **DevOps:** Docker, Kubernetes, RabbitMQ, GitHub Actions, CI/CD
 - **Cloud:** AWS, Vercel, Netlify
 - **Testing:** Jest, Cypress, React Testing Library, Supertest
 - **Architecture:** Event-driven systems, API design, system optimization
-

PROFESSIONAL EXPERIENCE

FRONTEND DEVELOPER | LUXURY CLOSET NG

August 2025 - February 2026

AI-powered ecommerce fashion platform enabling users to shop clothing online and virtually try on outfits using AI-generated images.

- Developed responsive ecommerce interfaces including product browsing, cart, and checkout flows.
- Built AI virtual try-on frontend features for personalized product visualization.
- Optimized UI performance and mobile responsiveness across devices.
- Integrated frontend workflows with backend and AI image generation systems.

FULL-STACK DEVELOPER | HELPER AI

March 2025

Inventory management platform designed to help businesses manage products, workflows, and operations through centralized dashboards and automated backend systems.

- Built and maintained a full-stack inventory management system with scalable APIs and structured database architecture.
- Developed responsive dashboards and admin interfaces for operational workflows and reporting.
- Implemented backend automation services to streamline inventory processes.
- Improved application performance and scalability through optimized architecture decisions.

SENIOR MOBILE ENGINEER | BABELOS (MUTA APP)

June 2025

Gamified language learning mobile platform focused on engagement through real-time interactions, leaderboards, and user progression systems.

- Lead engineer for Muta, a gamified language learning platform built with React Native (Expo).
- Built reusable UI system and real-time features (streaks, leaderboards).
- Optimized API performance and caching for high user load.

FULL-STACK ENGINEER | WRITAGENT

December 2024 – August 2025

AI-powered SaaS platform enabling automated content workflows, AI-driven tools, and scalable microservice infrastructure.

- Built NestJS microservices using RabbitMQ, Kubernetes, PostgreSQL.
- Developed AI workflows with OpenAI + LangChain.
- Created dashboards with React + TypeScript.

BACKEND ENGINEER | MUVMENT NG

September 2023 – June 2024

Vehicle rental and mobility platform providing booking workflows, host onboarding systems, and payment processing infrastructure.

- Built a scalable backend in NestJS and MongoDB for a vehicle rental system.
- Developed microservices handling bookings, verification, and payment workflows.
- Optimized API performance and automated host verification (40% faster onboarding).

BLOCKCHAIN ENGINEER | JAPPAUL

March 2023 - September 2024

Blockchain infrastructure project focused on smart contracts, decentralized integrations, and cross-chain interoperability.

- Built smart contracts and Solana / Ethereum bridge.
- Optimized gas usage and contract security.

LEAD BACKEND DEVELOPER | GAS AGGREGATOR COMPANY NIGERIA (GACN)

December 2022 – April 2023

Operational automation platform supporting business workflows, scheduling systems, and payment integrations.

- Built automated workflows with NestJS.
- Integrated payment systems and external scheduling tools like Calendly.

PROJECTS

Writagent (AI SaaS) • Muta (Language App) • Tinapay (Fintech) • Thumb & Pin (Fintech) • Black Diamond (Event Bookings)

EDUCATION

University of Benin

B.Sc. in Computer Science (2018 - 2022)
