SENIOR SOFTWARE ENGINEER

Full-Stack Software Engineer with 7+ years of experience designing and building scalable, high-performance applications across web, mobile, automation, and distributed systems. Expert in React.js, TypeScript, Tailwind CSS, Node.js, NestJS, PostgreSQL, REST, GraphQL, and WebSockets.

Highly skilled in end-to-end feature ownership from UI architecture and pixel-perfect frontend development to backend API design, database optimization, and DevOps automation. Experienced collaborating with cross-functional teams in dynamic, remote, and global environments. Passionate about writing clean, testable code and mentoring development teams.

CORE SKILLS

- **Frontend Technologies:** React.js, Next.js, React Native, TypeScript, JavaScript, Tailwind CSS, Material UI, Redux, Zustand
 - **Backend Technologies:** Node.js, NestJS, Express.js, REST APIs, GraphQL, WebSockets, Microservices
 - **Database:** PostgreSQL (schema design, optimization), MongoDB, Redis
 - **Systems:** Docker, Kubernetes, RabbitMQ, Event-driven architecture
 - **UI/UX:** Responsive Design, Material UI, Styled Components, Framer Motion
 - **Testing & Performance:** Jest, React Testing Library, Cypress, Supertest
 - **DevOps & Tooling:** Git, GitHub Actions, CI/CD, Gitflow Webpack, Vite
 - **Cloud & Monitoring:** AWS, Vercel, Netlify, New Relic
-

PROFESSIONAL EXPERIENCE

SENIOR MOBILE ENGINEER | BABELOS (MUTA APP)

June 2025

- Lead engineer for Muta, a gamified language learning platform built with React Native (Expo).
- Designed scalable UI architecture and reusable components improving feature velocity.
- Implemented real-time lesson updates, streak systems, leaderboards, and progress tracking.
- Integrated backend APIs and optimized client-side caching for thousands of concurrent learners.

FULL-STACK ENGINEER | WRITAGENT

December 2024 – August 2025

- Built and maintained complex backend services using NestJS, microservices, Kubernetes, and RabbitMQ.
- Architected end-to-end AI-driven workflows using OpenAI & LangChain.
- Designed dashboards, interfaces, and admin tools with React.js and TypeScript.
- Implemented PostgreSQL data structures and optimized heavy and distributed workloads.
- Automated onboarding, verification, and reporting workflows—improving operational efficiency by 70%.
- Led testing strategy (unit, integration, E2E) ensuring code reliability.

BACKEND ENGINEER | MUVMENT NG

September 2023 – June 2024

- Built a scalable backend in NestJS and MongoDB for a vehicle rental system.
- Developed microservices handling bookings, verification, and payment workflows.
- Optimized API performance and automated host verification (40% faster onboarding).

REACT NATIVE DEVELOPER | THUMB AND PIN

Apr 2024 - Jan 2025

- Developed and maintained a fintech app supporting payments and virtual cards.
- Integrated biometric authentication and improved API response times by 30%.
- Collaborated with backend teams on API schema improvements and testing.

BLOCKCHAIN ENGINEER | JAPAU

March 2023 - September 2024

- Designed and deployed smart contracts and cross-chain token bridge (Solana ↔ Ethereum).
- Performed gas optimization, audits, and stability improvements to ensure secure transactions.

LEAD BACKEND DEVELOPER | GAS AGGREGATOR COMPANY NIGERIA (GACN)

December 2022 – April 2023

- Built automated onboarding, due diligence, and gas request workflows with NestJS.
- Integrated payment systems and external scheduling tools like Calendly.
- Implemented CMS capabilities using Sanity for internal teams.

SENIOR FULLSTACK ENGINEER | TINAPAY

January 2022 - October 2022

- Built and optimized React.js and React Native features, boosting performance by 35%.
- Developed APIs using NestJS and Express.js with PostgreSQL and MongoDB.
- Ensured synchronization between mobile and web platforms with 95% uptime.

SENIOR FULL-STACK DEVELOPER | BLACK DIAMOND

February 2021 - December 2021

- Developed a responsive React.js interface with Tailwind CSS, raising user engagement by 30%.
- Designed backend payment architecture using NestJS and Stripe.
- Improved checkout and booking flows, reducing drop-off rates.

PROJECTS

- **Writagent:** AI writing SaaS using NestJS, Kubernetes, RabbitMQ, OpenAI.
- **Muta (Babelos):** Gamified language learning platform.
- **TINAPAY:** Fintech with automated transactions, reporting & mobile/web sync.
- **Thumb and Pin:** Virtual card + biometric fintech app.
- **Black Diamond:** Booking platform with Stripe + NestJS.

EDUCATION

University of Benin

B.Sc. in Computer Science (2018 - 2022)
